

Sales Strategy & *Pricing.*

How to package, position, and price GEM for sale.
Aligned with the live \$9 → \$29 → \$79 → \$149 ladder.

PART ONE

Market Positioning

GEM sits at the intersection of three growing markets: AI content tools, social media management, and faceless content creation. Where competition forces creators into expensive monthly subscriptions, GEM offers a one-time-purchase, self-hosted alternative — anchored on the AI & tech creator wedge where trends move daily and audiences want concrete workflows.

Who buys GEM

- ❖ **Solo content creators.** Faceless YouTubers, Instagram theme-page operators, and TikTok creators who run 1–5 channels and want to scale output without hiring writers.
- ❖ **Small agencies (1–10 people).** Social media agencies managing 5–30 client channels who need consistent quality without paying \$300+/month per seat for Jasper, Copy.ai, or Hootsuite AI.
- ❖ **Faceless brand operators.** People running 3–10 niche brand accounts — the original buyer profile GEM was built around.
- ❖ **Course creators & coaches.** Content marketers who need polished scripts, image generation prompts, and per-platform copy to fuel their funnel.
- ❖ **AI-curious builders.** Operators who want to own their tools and avoid SaaS lock-in. The single-HTML-file architecture is a feature for this group.

Competition analysis

Competitor	Price / Month	Their Weakness	GEM Advantage
Jasper AI	\$49–\$125	Generic, cloud-only, no video	6 specialist agents + local
Copy.ai	\$49–\$249	Single-purpose, no per-channel	Multi-channel built-in
ChatGPT Plus	\$20	Manual orchestration	Pipeline runs end-to-end
Hootsuite AI	\$249–\$739	Scheduling-first, weak gen	Generation-first + Quality Bar
Pictory / Synthesia	\$23–\$79	Video-only, no scripts	Full content drop
HeyGen	\$24–\$120	Avatar-only, no strategy	Strategy + script + visuals

PART TWO

Pricing Strategy

GEM ships with a four-rung lifetime ladder. The Founder's Edition is a deliberate loss-leader for feedback — the math compounds once the price ratchets through each tier. Pricing on the live site (thegeminfo.com) is the source of truth.

Tier	Price	For	When
Founder's Edition	\$9 once lifetime	Anyone willing to ship feedback	First 100 buyers · current
Builder	\$29 once lifetime	Solo creators & operators	Sales 101–500
Operator	\$79 once lifetime	Pro creators with multi-channel ops	Sales 501–2,000
Studio	\$149 once lifetime	Small agencies & content teams	After 2,000 sales

Why this ladder works

- **\$9 Founder's Edition.** Removes price as the reason a curious early adopter doesn't try GEM today. Buys feedback, not revenue. Hard-capped at 100 buyers.
- **\$29 Builder.** Still impulse-buy territory, with the social proof of 100 founders already shipped. Most volume sits here.
- **\$79 Operator.** The legitimate "I run a real content operation" price. Compares favorably to ~1.5 months of Jasper.
- **\$149 Studio.** Small agency / multi-brand ceiling. Includes commercial license. Sets up future white-label tier without committing today.

PART THREE

Alternative Pricing Models

If the four-rung ladder doesn't fit your appetite for risk, here are the alternatives we considered and deliberately rejected.

Model	Price	Best for	Trade-off
Single flat price	\$49	Simple positioning, fast launch	No FOMO, no founder loop
Lifetime deal (AppSumo)	\$39 (capped)	Mass distribution	~70% revenue share
Subscription	\$9/mo	Predictable MRR	Conflicts with the privacy-first ethos
Done-with-you	\$1,500+	High-touch enterprise	Slow cycle, requires demos
Pay-what-you-want	\$0-\$??	PR splash, viral pricing	Gross revenue usually 1/3 of fixed

Final recommendation

\$9 → \$29 → \$79 → \$149. The four-rung lifetime ladder is the production strategy. Use Founder's Edition as marketing default — every page on thegeminfo.com leads with \$9 and the 100-seat counter creates honest scarcity.

PART FOUR

How to Sell GEM

Sales platforms

- ❖ **Gumroad.** Best for launch + lifetime sales. ~10% fee. Built-in audience for digital tools. Recommended primary SKU for the \$9 Founder's Edition.
- ❖ **Lemon Squeezy.** Best for global tax handling. They are merchant of record. ~5% + \$0.50.
- ❖ **Stripe + your own site.** Lowest fees (~2.9% + \$0.30). Requires building checkout.
- ❖ **AppSumo.** Massive volume launch only. They take 70% but deliver 1,000–5,000 sales in 30 days.
- ❖ **Whop / Cosmos.** Audience-first communities. Better fit for Studio tier with Discord access.

Marketing channels

Channel	Tactic	Expected ROI
Twitter / X	Build-in-public threads showing pipeline output	High — viral potential
YouTube tutorials	Show GEM running, generating real assets	Highest — buyers see proof
Reddit	r/Entrepreneur, r/sidehustle, r/AItools	Medium — strict rules
Indie Hackers	Launch story + lessons learned	Medium — supportive audience
Product Hunt	One-day spike on Founder pricing	High — needs prep
Newsletter sponsorships	AI/marketing newsletters \$50–\$500/issue	Medium–High
Affiliate program	30% commission to creators who promote	Compounds over time
Cold DM agency owners	Personalized DMs with the live sample	Low scale, high conversion

PART FIVE

Sales Page Copy

Headline options

- "One idea. Every channel. Six AI agents." — GEM's live hero.
- "Stop paying \$50/month for generic AI content. Own your tool forever."
- "The daily content drop for AI & tech creators — runs on your laptop, never expires."
- "A complete content pack in 90 seconds. Forever, for nine dollars."

Three-paragraph pitch

Hook. You're running multiple content channels. YouTube, Facebook, Instagram, maybe a blog. Every week you need ideas, scripts, hashtags, image prompts, video prompts — and you're paying \$50–\$200/month for AI tools that produce generic output.

Reveal. GEM is different. Six AI agents work in sequence: Brand sets voice, Scout pulls live trends (Reddit/HN/Google Trends with a documented r/popular fallback), Architect structures the piece, Writer drafts the script, Visual writes prompts for Midjourney/DALL-E/FLUX/Kling/RunwayML, and Adapter rewrites for each platform. Each agent's output is graded against a six-rule Quality Bar before the next runs.

Close. One-time purchase. Lifetime updates. Runs locally on Ollama or any cloud LLM. Compare to Jasper at \$1,500/year or Hootsuite at \$9,000/year. GEM is \$9 once during Founder's Edition, then \$29 / \$79 / \$149 as the cohort grows. That's the difference between renting and owning.

Bullets for the landing page

- ✓ 6 specialist AI agents — Brand, Scout, Architect, Writer, Visual, Adapter
- ✓ Master prompts for Midjourney v6, DALL-E 3, FLUX.1, Kling AI, RunwayML
- ✓ Per-channel adaptation — YouTube, IG, FB, TikTok, LinkedIn, blog
- ✓ Trending Mode — live Reddit / HackerNews signals (Google Trends via r/popular fallback)
- ✓ Quality Bar — every agent's output graded before the next runs
- ✓ 100% local on Ollama, or BYO key for OpenAI / Anthropic / OpenRouter
- ✓ Designer-grade PDF export, JSON save/load, 12 niche templates
- ✓ Founder's Edition commercial-use license included

PART SIX

Product Roadmap

Shipped in v1.7 (now live on thegeminfo.com)

- ✓ Quality Bar checks — six rules every drop must clear before publish
- ✓ "Today's Brief" sample on landing — real AI / tech niche pack
- ✓ Roadmap teaser + Founder voting on what ships next
- ✓ Trending Mode CORS honesty surfaced directly in the live FAQ
- ✓ Founder credibility line + AI Decoded / Tools That Work case-study fuel
- ✓ Legacy three-tier launch ladder fully removed from public copy

Next quick wins (v1.8 — 2–3 weeks)

- Image generation in-app via Replicate / Together AI
- Search & filter in the Library once it grows past 20+ pieces
- A/B title generator — 5 alternatives per piece
- Custom niche slot — user-defined niches beyond the built-in 12
- PDF custom branding — user logo / colors on the export cover
- YouTube comment scraper as a trending signal

Major modules (v2.0 — 2–3 months)

- Daily auto-brief — ranked content brief delivered every morning
- Approval workflow — approve / edit / regenerate / reject + version history
- Direct publish — push approved drops to Buffer / Later / Meta / YouTube
- Performance loop — yesterday's winners feed tomorrow's brief
- Team collaboration — multi-user (still local), comments, role-based approvals
- Audio generation — ElevenLabs script-to-voiceover
- Custom agent builder — power users define their own agents

PART SEVEN

Revenue Projections

Projections recalibrated for the \$9 → \$29 → \$79 → \$149 ladder. Founder's Edition is a hard-capped 100 seats; everything past that ratchets up.

Scenario	Sales / Mo	Tier Mix (F / B / O / S)	Avg ARPU	Monthly Revenue	Year 1
Conservative	25	15 / 7 / 2 / 1	~\$28	\$691	\$8,292
Realistic	75	40 / 25 / 8 / 2	~\$36	\$2,719	\$32,634
Optimistic	200	90 / 75 / 25 / 10	~\$48	\$9,605	\$115,260
Viral / PH spike	500	200 / 200 / 75 / 25	~\$53	\$26,475	\$95K+ (one-time)

Ladder math — cumulative gross at each rung

- 100 Founders × \$9 = **\$900** (cohort-builder, deliberate loss-leader)
- 400 Builders × \$29 = **\$11,600**
- 1,500 Operators × \$79 = **\$118,500**
- 2,000 Studios × \$149 = **\$298,000**
- Cumulative ceiling: **~\$429K gross** at ~95% margin across the four rungs.

Cost structure

Cost	Per Month	Notes
Hosting	\$0–\$20	Vercel / Cloudflare static; Gumroad checkout
Email service	\$0–\$30	ConvertKit or Buttondown
Discord (community)	\$0	Nitro Server Boost optional
Domain	~\$1	\$12/year
Payment processing	~3–10%	Gumroad ~10% / Stripe ~3% / Lemon Squeezy ~5%+\$0.50
